

FILERS BY POPULATION AND MEDIAN INCOME

In general, communities with larger populations are likely to have more filers and communities with smaller populations are likely to have fewer filers. However, on a specific level, there is often a wide disparity in population between municipalities with the same number of filers. There is no evident connection between median income and the number of filers.

| Municipality | # of Required Filers | Population | Median Income |
|-----------------------|----------------------|------------|---------------|
